

attocube systems AG & neaspec GmbH: Merger now legally effective

Since 2014 neaspec GmbH is part of the attocube systems AG. With the Commercial Register entry on November 4, 2020 the merger of the two companies is now also legally effective.

With the three strategic business sectors „Motion & Sensing“, „Cryogenic Instruments“, and „Nanoscale Analytics“ (with the product line neaspec) attocube is leading single-source supplier for cutting-edge solutions for nano-precise positioning, cryo-nanoscopy and nano-spectroscopy for industry and research customers.

The merger simplifies the company structure and leverages synergies in infrastructure, administration, R&D, and sales. Joint development projects have already been realized successfully and will be intensified in the future.

The procedure required by law regarding the merger of neaspec GmbH and attocube systems AG has now been brought to a successful conclusion with the entry into the Commercial Register of Munich District Court under HRB 138094. In accordance with the provisions of the relevant legislation, the merger took legal effect retroactively on the effective merger date (November 4, 2020)

4. November 2020
